

NETSECURE ENDPOINT SECURITY

Enterprise endpoint protection for
any size business

68%

of companies were hit
by one or more endpoint
attacks over the past
12 months

Netsecure Endpoint Security is a cloud-delivered, enterprise-grade endpoint security service, to bolster protection for any business including SOHO, Micro / Small Business, from the latest generation of targeted threats - including advanced malware, ransomware or fileless / 'living off the land' attacks at the device level.

The solution integrates the next generation cloud endpoint security solution from Trend Micro™ to protect all endpoint device types including PCs (Laptop, Desktop & Server (including virtualised deployments)), Macs, Smartphones (OS and Android) and Window servers.

Key Highlights
